# Avia Flight Academy

presents

## Young Aviator Academy

---

Our children are our future.  
We owe them only the best.  
Join our exciting program!

---

---

## ABOUT OUR PROGRAM

---

Young Aviator Academy is specifically designed for grades 6-12 to spark and nurture their interest in science and to provide an exciting opportunity to explore that interest through the world of aviation.

**Our program is based on following core principles:**

- Science is our power engine
- Fun and engaging
- Certified flight instructors teach
- Smaller class sizes

---

## LEARN TO FLY AND FLY

Learn the basic principles of aerodynamics, flight instruments, controls and weather patterns, and apply it in a simulator and a real aircraft.

### IT IS ALL ABOUT SCIENCE

Understanding the scientific principles of flight is the foundations of learning how to fly. We will also learn about technology, design and mathematical calculation necessary to carry out a flight.

### ENGAGE AND INTERACT

Our lessons are built on innovative learning practices to encourage engagement and interaction throughout the session.

### BE CREATIVE AND THINK

We will look at the things from different perspectives and focus on solving challenging aviation problems.

---

---

## WHAT THE PACKAGE INCLUDES

---

Five 120 minutes classroom sessions

One optional flight session with a certified flight instructor

Pilot logbook to log your flight time

Refreshments for all our aviators during sessions
